haoyu-library > src > views > WeatherView.vue > {} script setup > [e] searchByCity

```
22 </div>
23 </template>
24 </script>
25 <script setup>
26   import axios from 'axios'
27   import { computed, onMounted, ref } from 'vue'
28
29   const apiKey = '76c39de5375398140c7edaf380fd6bfc'
30
31   const city = ref(null)
32   const weatherData = ref(null)
33
34   const hourlyForecast = ref(null)
35   const dailyForecast = ref(null)
36
37   const temperate = computed(() => {
38     return weatherData ? Math.floor(weatherData.value.main.temp - 273) : null
39   })
40
41   const iconUrl = computed(() => {
42     return weatherData
43       ? `http://api.openweathermap.org/img/w/${weatherData.value.weather[0].icon}.png`
44       : null
45   })
46
47   onMounted(async () => {
48     await fetchCurrentLocationWeather()
49   })
```

The screenshot shows the VS Code editor interface. On the left, the 'src' directory is expanded, showing a list of files including 'components', 'icons', 'BHeader.vue', 'BookList.vue', 'Form.vue', 'WelcomeItem.vue', 'router', 'index.js', 'store', and 'views'. The 'views' directory is expanded, showing 'AboutView.vue', 'AddBookView.vue', 'CountBookAPI...', 'FirebaseLogin.vue', 'FirebaseRegisterView...', 'GetBookCount...', and 'WeatherView.vue'. The 'WeatherView.vue' file is selected, and its content is displayed in the editor. The code includes a script setup with a searchByCity function and a fetchCurrentLocationWeather function.

```
24 <script setup>
25 //
49
50 const searchByCity = async()=>{
51   try{
52     const url = `https://api.openweathermap.org/data/2.5/weather?q=${encodeURIComponent(city.value)}&appid=${apiKey}`
53     await fetchWeatherData(url);
54   }catch(e){
55     console.log(e)
56   }
57 }
58
59
60 const fetchCurrentLocationWeather = async () => {
61   console.log('start')
62   if (navigator.geolocation) {
63     navigator.geolocation.getCurrentPosition(async (position) => {
64       const { latitude, longitude } = position.coords
65       const url = `http://api.openweathermap.org/data/2.5/weather?lat=${latitude}&lon=${longitude}&appid=${apiKey}`
66       await fetchWeatherData(url)
67     })
68   }
69 }
```

The screenshot shows the VS Code editor interface. On the left, the 'src' directory is expanded, showing a list of files including 'components', 'icons', 'BHeader.vue', 'BookList.vue', 'Form.vue', 'WelcomeItem.vue', 'router', 'index.js', 'store', and 'views'. The 'WeatherView.vue' file is selected, and its content is displayed in the editor. The code includes a script setup with a fetchCurrentLocationWeather function and a fetchWeatherData function.

```
24 <script setup>
25 //
49
50 const searchByCity = async()=>{
51   try{
52     const url = `https://api.openweathermap.org/data/2.5/weather?q=${encodeURIComponent(city.value)}&appid=${apiKey}`
53     await fetchWeatherData(url);
54   }catch(e){
55     console.log(e)
56   }
57 }
58
59
60 const fetchCurrentLocationWeather = async () => {
61   console.log('start')
62   if (navigator.geolocation) {
63     navigator.geolocation.getCurrentPosition(async (position) => {
64       const { latitude, longitude } = position.coords
65       const url = `http://api.openweathermap.org/data/2.5/weather?lat=${latitude}&lon=${longitude}&appid=${apiKey}`
66       await fetchWeatherData(url)
67     })
68   }
69 }
70
71 const fetchWeatherData = async (url) => {
72   try {
73     const response = await axios.get(url)
74     weatherData.value = response.data
75     console.log(weatherData.value)
76   } catch (e) {
77     console.log(e)
78   }
79 }
80 </script>
81
```

Set 2:

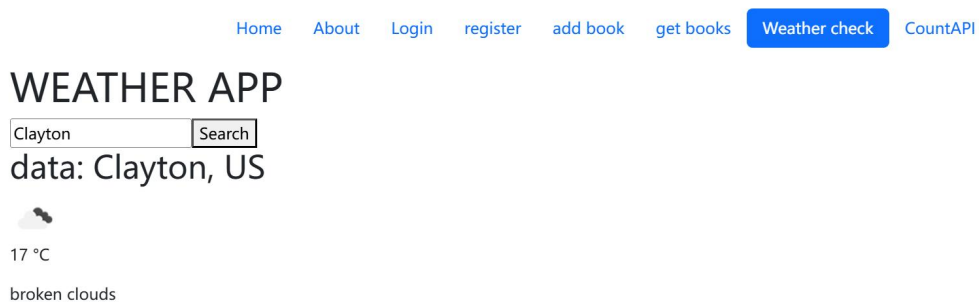

The screenshot shows a web browser window with the address bar displaying 'localhost:5173/countBookAPI'. The browser tabs include '学习', '娱乐', 'master', '(56) YouTube', '哔哩哔哩', '主页 | 莫纳什大学...', '(2) Dashboard', '欢迎', '早道学习中心', and 'Messenger'. The main content area shows a JSON response: '{ "count": 6 }'.

```
{
  "count": 6
}
```

```
1 <template>
2   <pre>{{ jsondata }}</pre>
3
4 </template>
5
6 <script setup>
7   import axios from 'axios';
8   import { onMounted, ref } from 'vue';
9
10  const jsondata = ref(null)
11  const error = ref(null)
12  const count = null;
13
14  onMounted(async()=>{
15    await getBookCountAPI();
16  })
17
18  const getBookCountAPI= async()=>{
19    try{
20      const response = await axios.get('https://countbooks-yof7xvdqrq-uc.a.run.app');
21      jsondata.value = response.data;
22      error.value= null;
23    }catch(e){
24      console.log(e);
25      error.value = e;
26      count.value = null;
27    }
28  }
29
```
