

Task 9:

Set 1

The screenshot shows the Firebase console interface. On the left is a sidebar with navigation options: Home, Authentication, Firestore Database, Functions (selected), and AI. The main area is titled 'Functions' and shows a table of functions. The table has columns for '函数' (Function), '触发器' (Trigger), '版本' (Version), '请求数 (24 小时)' (Requests (24 hours)), '实例数下限/上限' (Instance count min/max), and '超时' (Timeout). One function is listed: 'countBooks' with version 'v2', 0 requests, and a 1-minute timeout. Below the table, there are pagination controls showing '第 1-1 条, 共 1 条' (1-1 items, total 1 items).

Set 2:

Get Books Count

get Book Count
Total Books: 6

The screenshot shows a code editor with a file explorer on the left and a code editor on the right. The file explorer shows a project structure with folders like 'LAB', 'src', 'components', 'icons', 'router', 'store', 'views', and 'firebase.js'. The code editor shows the 'GetBookCountView.vue' file. The code is as follows:

```
1 <template>
2   <div id="app">
3     <h1>Get Books Count</h1>
4     <button @click="getBookCount">get Book Count</button>
5     <p v-if="count !== null">Total Books: {{ count }}</p>
6     <p v-if="error">{{ error }}</p>
7   </div>
8 </template>
9
10 <script setup>
11   import axios from 'axios';
12
13   import { ref } from 'vue';
14
15   const count = ref(null);
16   const error = ref(null);
17   const getBookCount = async() => {
18     try{
19       const response = await axios.get("https://countbooks-yof7xvdqrq-uc.a.run.app");
20       console.log(response.data);
21       count.value = response.data.count;
22       error.value = null;
23     }catch(err){
24       error.value = 'Error fetching book count';
25       count.value = null;
26     }
27   };
28 </script>
```
